Club Hub is an **official** service. The events in this table **have been approved** by Student Life.

See what's next in one glance.

Club Hub presents an entirely revamped layout that highlights the important details for every event: date, posters, event name, host name, description, time, and location.

It also introduces a fresh minimalist design: an organized and clean contrast to the clutter of an inbox.

Posters are nice! (But not required!)

Club Hub gives color to plain text by placing posters alongside event information. Clicking on a poster produces an enlarged view of the image.

Don't have a poster? Don't worry! Club Hub's automatic layout generator presents both postered and poster-less events alike with equal elegance.

Organize it with Filter and Sort.

Create order from chaos by focusing on the events you want. With Club Hub, you can click on the labels in the black header bar to sort by those categories.

Clicking on a specific event's date, host, title, or location adds a filter that removes all other events from the view. Now you can see which events fit your time and interests with ease!

A Poster Slideshow to Dazzle

Using the magic of code, Club Hub LIVE grabs your event data and automatically creates a beautiful poster slideshow for display around your organization.

Poster-less events can participate too! Club Hub LIVE features a clean slide template for plain-text ads as well.
